NATICA
IT Consulting

We started financial process improvements and ERP project. We forecast the economic conjuncture and prepare budget and cash flow projections. Our aim is to measure the profitability and cash generation power of profit centers with accurate reporting. To determine cash break-even points and net capital requirement. Measure and interpret the response of cash to risk scenarios.

BAYTUR
GLOBAL LOJİSTİK A.Ş.

We provide support in managerial and financial matters to support growth. We have adapted technology software (Fin-Tech) to financial processes, thus eliminating many manual and repetitive processes. We reduced the risks of error and misconduct. We started our ERP project that will bring all our processes into the same ecosystem. Thus, we aim to provide efficiency in processes by solving problems arising from integration and manual processes. We have determined and implemented accounting policies that will increase credibility and we are getting the results.

ERL PHARMA

We structured cost accounting. We supported investment decisions by preparing profitability and cash flow projections of machinery investments. We monitor and report the transition process from the investment period to the operation period and efficiency.
